BRUDER: REDEFINING EXPEDITION TRAVEL

ABOUT

Bruder is an award-winning manufacturer with products sold globally and used across six continents. With an unwavering commitment to capability, quality, innovation, and luxury.

CLIENTELE AND EXPERTISE

Bruder caters to a diverse clientele, ranging from the general public to royalty. The company also specializes in commercial products, producing trailers tailored for exploration companies and defense organizations, including the Australian Defense Force (ADF).

REVOLUTIONARY TECHNOLOGY AND DESIGN

Bruder designs are unique from the ground up, featuring globally patented innovations. Unlike conventional off-road trailers or caravans, Bruder EXP trailers are equipped with a 48V electrical system. Combined with more than 1600W of solar power and over 20kW of lithium battery storage, Bruder EXP trailers are fully self-sustainable, capable of powering a small household or charging an electric vehicle.

Engineered to endure the harshest environments, Bruder trailers are designed to handle conditions ranging from sub-zero temperatures to scorching desert heat. Bruder EXP trailers also feature a patented suspension system with 300mm of suspension travel—three times more than other off-road trailers. Most off-road trailers offer only 20-100mm of suspension travel, significantly limiting their off-road performance. The Bruder suspension ensures smooth travel even on the most rugged terrains.

PRODUCT RANGE

Bruder offers a range of expedition trailers that blend luxury, durability, and functionality. With prices starting at \$100,000 and extending to over \$600,000 for bespoke designs, each trailer is meticulously crafted to meet individual client specifications. From integrated technological advancements to bespoke luxury features, Bruder ensures every detail enhances the user experience.
