

BRÜDER

EXP-4

THE ULTIMATE COMPACT EXPEDITION TRAILER.

The Bruder EXP-4 sets the benchmark for off-road capability and ease of use. Its unparalleled versatility and quick setup make the EXP-4 truly unique. With the EXP-4, you'll spend less time organising and more time enjoying your journey. Tow comfortably across the harshest terrains, level your sleeping area in seconds, and be ready to go anytime. Travel with the confidence that the EXP-4 is engineered to thrive in the roughest conditions like no other compact design.

SET UP IN SECONDS

Adventure-ready.

No camper will set up or pack up faster than the EXP-4. Its patented suspension levels out terrain, ensuring your bed is always accessible, while the rear hatch door provides immediate shelter for the kitchen. We have dedicated ourselves to designing a product that makes camping, exploring, and traveling easier than ever before.

HANDCRAFTED WORKMANSHIP

Every detail is meticulously crafted. While other trailers are built for mass production, hundreds of hours of handmade craftsmanship go into each EXP-4, ensuring exceptional quality with the finest durable materials. The EXP-4 is constructed to outlast others.

RUGGED RESILIENCE

Stronger than the rest, the EXP-4's epoxy-bonded composite construction, up to 60mm thick, sets it apart from any other camper in the industry. Not only does it keep you insulated against arctic conditions and blistering desert temperatures, but it also provides the functionality to support an additional rooftop tent, rack, or other equipment on your adventure.

SEAMLESS CONTROL FOR LIMITLESS ADVENTURES

Integrated 12V Victron technology offers seamless control over suspension, climate regulation, reversing cameras, and other electrical functions. With fob-controlled suspension and a digital display providing real-time electrical status updates, navigating the unknown has never been more intuitive.

YOUR ULTIMATE TOWING EXPERIENCE

Whether navigating winding roads or tackling rugged terrain, our innovative design ensures each journey is a breeze. Plus, with up to 90-degree turning angles, conquer tight corners and tricky spots with ease—the EXP-4 is built to genuinely handle the rough off-road environment.

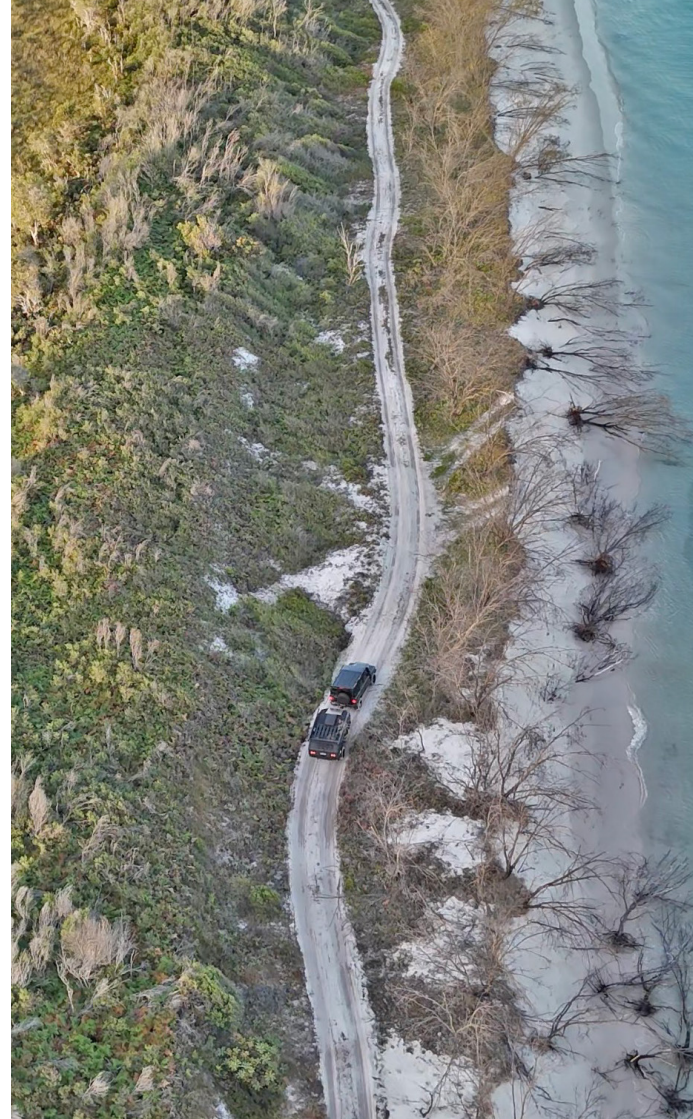

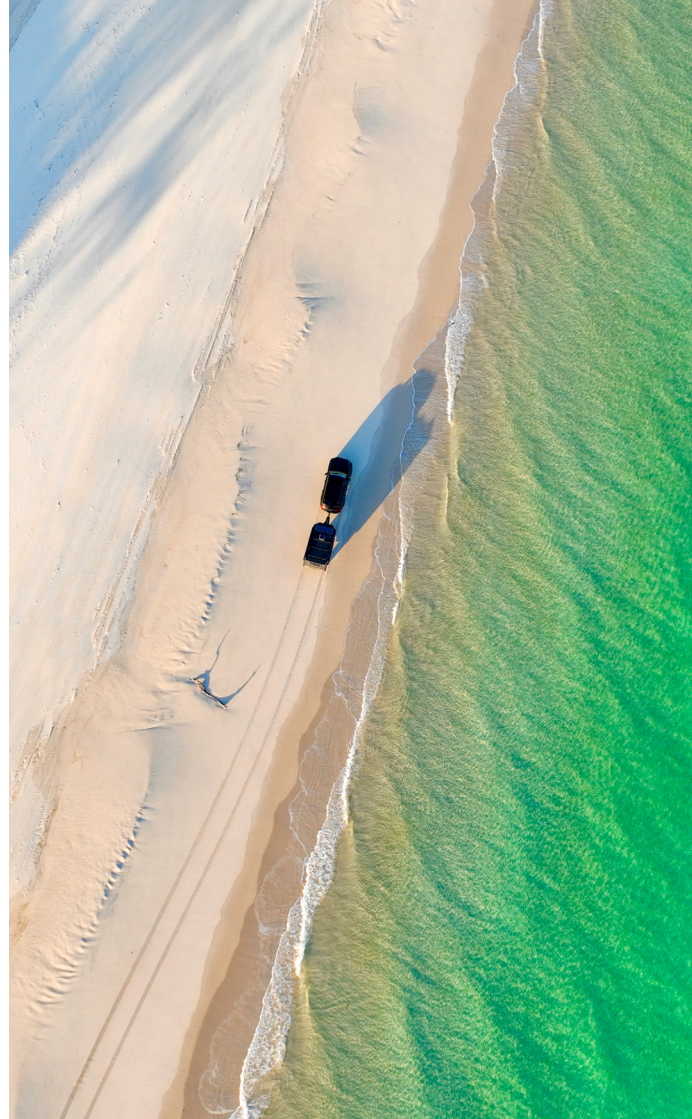

SUSPENSION

Bruder sets the standard with our patented suspension system, rigorously tested across six continents and over 100,000 kilometers in every imaginable terrain. Trusted by adventurers worldwide and used by military and commercial organisations, only Bruder delivers the ultimate combination of innovation and endurance, ensuring unparalleled performance on any journey.

EMBRACE THE OUTDOORS

Our design invites you to explore further afield into nature—camp comfortably on unlevel terrain—large doors on either side provide panoramic views, and smart storage solutions provide all you need for a comfortable camping experience that allows you to connect with the environment around you.

500W SOLAR & 200AMP LITHIUM

The EXP-4 is designed to excel in off-grid adventures. Its 200-amp lithium battery ensures a reliable power supply, while the 500W solar system keeps it charged throughout daylight hours. For those requiring extra energy reserves, Bruder provides additional space for expanding lithium power capacity, ensuring you're covered no matter where the journey takes you.

POSITIVE PRESSURISING SYSTEM

Keep the dust away by providing positive filtered air pressure into the cabin; this provides greater air pressure inside the cabin than outside.

VERSATILE ROOF RACK SYSTEM

Our heavy-duty roof rack system is built to handle it all, from mounting boards and boats to accommodating additional roof tents. The EXP-4 is built to handle it.

EXPANSIVE SHADE COVERAGE

Enjoy instant shade over the kitchen—or expand your coverage with a 180-degree awning. The beauty of the EXP-4 lies in its versatility.
