

BRÜDER

EXP-7

MEET THE BRUDER EXP-7

Embark on an adventure with the ultimate hybrid expedition trailer. The EXP-7 offers the flexibility of a unique indoor/outdoor kitchen combination, seamlessly connecting you with nature. Its distinctive double-door design and features around the entire body deliver a true 360-degree camping experience—unlike traditional campers that utilise only one side. Available in both pop-top (PT) and hard-top grand tourer (GT) models, the deliberately sleek EXP-7 is built to navigate the tightest and roughest tracks. Its 48V electrical system pushes innovation and off-grid capability to new heights, offering unmatched comfort, convenience, and style in remote locations.

CHASSIS

The fully sealed Bruder chassis and suspension system are designed to operate in complete harmony. Our patented design is certified and engineered to handle five times the maximum weight of the EXP-7.

SUSPENSION

The EXP-7 is equipped with Bruder's globally patented suspension system—trusted by the Australian Defence Force (ADF) for specialised operations. It features 12 inches of adjustable suspension travel and has the unique ability to be towed even on three or two wheels.

CHOOSE FROM GT OR PT

The PT features Bruder's exclusive roof-lifting mechanism. The EXP-7 GT has a fixed roofline, making it taller than the PT. It provides higher levels of insulation for extreme climates and includes additional storage.

BODY CONSTRUCTION

Our unique composite body is certified and engineered to offer immense strength and insulation. Built to the highest standards, the body cell construction enhances durability and resilience—ensuring reliability in the toughest conditions.

An aerial photograph showing a black SUV towing a long, black trailer across a snowy, rocky terrain. The trailer is equipped with three large solar panels on its top surface. The SUV is positioned on the left side of the frame, moving towards the right. The trailer is long and narrow, with a small cabin at the front. The ground is covered in snow and scattered rocks, with some patches of brown vegetation visible. The overall scene suggests a rugged, off-road environment.

ENGINEERED FOR EXTREME CONDITIONS

Brave temperatures from below freezing in the arctic to blistering desert heat, the EXP-7 is engineered to conquer any environment with confidence..

SECONDS NOT MINUTES

With the push of a button, automatically level the trailer and deploy the electronic steps for instant access. The patented suspension system offers up to 12 inches of adjustability, ensuring a level and stable platform on uneven terrain—allowing you to camp where others can't.

UNMATCHED TOWING EXPERIENCE

The EXP-7 allows up to 90-degree turning angles, making tight manoeuvres effortless. Its suspension system absorbs vibrations and reduces stress on the tow vehicle, enhancing stability and ensuring a more controlled driving experience.

TECHNOLOGY MEETS CONVENIENCE

Access your trailer's luxuries effortlessly with the EXP-7's intuitive technology. Take command of suspension, climate, and lighting while monitoring the full electrical system via the digital screen or your mobile phone.

A TRUE OFF-GRID DESIGN

The EXP-7 features 48V electronic architecture with a 10kWh lithium battery system and over 1200W of solar. This advanced energy setup provides exceptional chargeback capabilities and unrivalled off-grid power for a trailer of this size.

CONVERTIBLE L-SHAPED LOUNGE

Easily convert the lounge into bunk beds for added versatility—perfect for accommodating children and maximising your living area.

UNPARALLELED CONVENIENCE

Our exclusive two-door design includes direct access to the wet room, a feature found only in Bruder models—offering exceptional convenience and functionality for every adventure.
